PROFESSIONAL SUMMARY

Information Technology professional with hands-on experience in ICT systems support, network infrastructure, and digital service delivery gained through attachment at the Ministry of Information, Communications and the Digital Economy. Comfortable with technical troubleshooting, ICT equipment maintenance, and end-user support. Proficient in software development (Python/Flask/Django/React), cybersecurity fundamentals, and computer systems implementation. Certified by Huawei, Cisco, and IBM. Looking to apply this combination of IT support and development experience in a government or institutional setting.

KEY COMPETENCIES

- ICT Equipment Maintenance & Configuration
- Data Entry & Records Accuracy (43 WPM, 99% accuracy)
- System Troubleshooting & Fault Diagnosis
- Fault Reporting & Incident Documentation
- Cybersecurity Principles & Threat Awareness
- User Technical Support & Help Desk
- Software Development & Systems Design
- Network Infrastructure Support
- Computer Systems Implementation Support

TECHNICAL SKILLS

Programming & Software Development: Python, C, C++, HTML/CSS, Flask, Django, React

Networking & Infrastructure: Network configuration, LAN/WAN fundamentals, ICT infrastructure management, Huawei datacom technologies

Cybersecurity: Threat identification, cyber risk management, security best practices

Tools & Platforms: MySQL, Postgres, QGIS, Microsoft Office Suite (Excel, Word, PowerPoint), Git/GitHub

CERTIFICATIONS

- Huawei Certified ICT Associate (HCIA Datacom) - Huawei
- Introduction to Cybersecurity - Cisco Networking Academy
- Cyber Threat Management - Cisco Networking Academy
- Python Essentials 1 - Cisco Networking Academy
- Enterprise Design Thinking Practitioner - IBM

TECHNICAL PROJECTS

HR & Payroll Platform

Flask · PostgreSQL/Supabase · HTML/CSS/JS — Practical Test Submission, Vunoh Global — [Live Demo](#)

- Built an internal HR and payroll platform covering employee records, leave management, and payroll generation as a timed technical assessment.
- Designed a leave workflow that checks team coverage before approving a request, enforces minimum notice periods, and auto-escalates unanswered requests after 48 hours.
- Implemented payroll calculation with progressive tax brackets and social security deductions, pro-rating pay for mid-month joiners and unpaid leave.
- Structured employee records with soft deactivation so payroll history remains intact after an employee leaves, rather than being deleted.
- Deployed the platform on Vercel with a PostgreSQL/Supabase backend.

Leave Management System

Python · Flask · MySQL · HTML/CSS — Prototype for the Ministry of Information, Communications and the Digital Economy -- [Live Demo](#)

- Developed a web-based leave management system to digitize staff leave applications and approval workflows.
- Designed a relational MySQL database for managing employee records, leave balances, and approvals.
- Implemented role-based authentication for staff and administrators, with automated PDF generation for official leave forms.
- Built a responsive interface accessible on desktop and mobile devices.
- Performed high-volume data entry and record digitization at 43 WPM with 99% accuracy, supporting fault reporting and audit-complaint documentation.

UsafiLink

Django · React · MySQL · Redis · Celery · Mapbox · M-PESA API -- Full-Stack, [Live Demo](#)

- Built a full-stack two-sided marketplace (Django REST Framework + React 19/Vite) connecting customers with exhauster truck drivers via a proximity-based matching algorithm across a 50 km radius.
- Integrated real-time GPS tracking and live vehicle visualization using Mapbox GL, with live driver location broadcasting.
- Implemented M-PESA mobile money integration with transaction auditing, payment verification, and dispute resolution, plus cash payment support with admin override.
- Designed an asynchronous Celery + Redis task architecture to offload SMS/email notifications and scheduled jobs from the main request cycle.
- Implemented JWT + Clerk OAuth authentication (TOTP 2FA), role-based access control, and packaged the frontend as a native Android app via Capacitor.
- Deployed on Railway with automated CI/CD across Django/Gunicorn, Celery worker, Celery Beat, MySQL, and Redis services.

PROFESSIONAL EXPERIENCE

ICT Intern

June 2025 – September 2025

Ministry of Information, Communications and the Digital Economy (MICDE) | Nairobi, Kenya

- Provided first-line technical support to staff across the State Department of ICT and Digital Economy, resolving hardware, software, and connectivity issues.
- Assisted with routine maintenance, configuration, and deployment of ICT equipment, including computers, printers, and network peripherals.
- Supported ICT officers in monitoring and troubleshooting network infrastructure, identifying and escalating faults per departmental ICT protocols.
- Participated in digital transformation projects aimed at improving public service delivery, working directly with e-government systems and ICT governance frameworks.
- Documented system operations, fault reports, and maintenance logs to support audit and compliance requirements.
- Handled high-volume data entry for equipment inventories and staff records, maintaining 99% accuracy at 43 WPM to support departmental audits.
- Collaborated with senior ICT officers to implement cybersecurity practices, including user access management and data protection policy awareness.

EDUCATION

Bachelor of Science in Information Technology

Graduation: August 2026

Jomo Kenyatta University of Agriculture and Technology (JKUAT) | Juja, Kenya

Kenya Certificate of Secondary Education (KCSE)

Grade: B+

Mudasa Academy | Vihiga, Kenya

Kenya Certificate of Primary Education (KCPE)

Marks: 321

Shamberere Primary School | Kakamega, Kenya
