PROFESSIONAL SUMMARY

BSc Information Technology graduate (JKUAT, August 2026). I built an AI tool that drafts an investment firm's weekly market report from CBK, NSE and REIT data and checks each figure against its source before an analyst signs off. That project is where I picked up market analysis. Before it I built payroll, leave and M-PESA payment systems in Python and React, and did a placement at Kenya's Ministry of ICT fixing hardware and network faults. Available to start immediately.

EDUCATION

Bachelor of Science in Information Technology Sep 2022 to Aug 2026
Jomo Kenyatta University of Agriculture and Technology (JKUAT) | Second Class Honours (Lower Division)

Kenya Certificate of Secondary Education (KCSE), Grade B+ Feb 2018 to Apr 2022
Mudasa Academy

PROFESSIONAL EXPERIENCE

Software and AI Engineering Intern Aug 2026 to Oct 2026
Vunoh Global Services Ltd | Nairobi Upperhill, Kenya

- Sole developer on an AI tool for an investment firm client. It drafts their weekly market report from CBK, NSE and REIT data, and every figure is checked against its source before an analyst signs off.
- Built the analyst review app in FastAPI and Next.js, containerised with Docker Compose and covered by 700+ automated tests.
- Built full-stack features in Django, PostgreSQL, React and Flask on other client projects, and wrote a daily brief on AI and business news for the team.

ICT Intern Jun 2025 to Sep 2025
Ministry of Information, Communications and the Digital Economy (MICDE) | Nairobi, Kenya

- First-line support for State Department of ICT and Digital Economy staff: hardware, software and connectivity problems.
- Configured and maintained computers, printers and network peripherals, helped monitor the network, and escalated faults under departmental protocol.
- Kept logs of system operations, fault reports and maintenance, used for audit and compliance.
- Entered equipment-inventory and staff-record data at 43 WPM with 99% accuracy, and worked with senior ICT officers on user access management and data protection.
- Contributed to e-government and ICT governance projects.

TECHNICAL SKILLS

Programming and development: Python, JavaScript, HTML/CSS, Flask, Django, FastAPI, React, Next.js, Docker.
AI and data: LLM-based report generation, source verification of figures, data analytics.
Databases and tools: MySQL, PostgreSQL, QGIS, Git/GitHub, Microsoft Office (Excel, Word, PowerPoint).
IT support and networking: Help desk and user support, network infrastructure support, fault diagnosis, data entry.
Cybersecurity: Threat identification, cyber risk management, security best practices.

CERTIFICATIONS

- Huawei Certified ICT Associate (HCIA Datacom), Huawei
- Introduction to Cybersecurity; Cyber Threat Management; Python Essentials 1, Cisco Networking Academy
- Data Analytics, ALX Africa
- Enterprise Design Thinking Practitioner, IBM

TECHNICAL PROJECTS

HR and Payroll Platform
Flask, PostgreSQL/Supabase | *Technical assessment, Vunoh Global* | Live demo

- Internal platform for employee records, leave and payroll. Payroll applies progressive tax brackets and pro-rates pay for mid-month joiners and unpaid leave; records are deactivated, not deleted, so payroll history survives an exit.
- Leave requests check team coverage and minimum notice before approval, and escalate automatically if unanswered after 48 hours.

Leave Management System
Python, Flask, MySQL | *Prototype for MICDE* | Live demo

- Replaced a paper-based leave process with a web system: MySQL schema for employee records, leave balances and approval history, with separate staff and administrator access.
- Generates official leave forms as PDFs; works on desktop and mobile.

UsafiLink
Django, React, MySQL, Redis, Celery, Mapbox | *Full-stack* | Live demo

- Two-sided marketplace matching customers with exhauster truck drivers within 50 km, with live GPS tracking on a map.
- M-PESA payments with transaction auditing, payment verification and dispute resolution, plus a cash fallback with admin override.
- Background jobs for SMS and email notifications; JWT authentication with two-factor login. Deployed on Vercel.

ACTIVITIES

- Participant in AI hackathons at JKUAT.
- Plays soccer.
