PROFESSIONAL SUMMARY

Information Technology professional with combined experience in software development and ICT systems support, gained through full-stack project work and a placement at Kenya's Ministry of Information, Communications and the Digital Economy. Builds and deploys web applications in Python/Flask/Django/React, alongside hands-on ICT troubleshooting, network infrastructure support, and end-user technical support. Grounded in cybersecurity fundamentals and computer systems implementation. Huawei, Cisco, and IBM certified, with an interest in applying this development and IT support background in a government or institutional setting.

TECHNICAL SKILLS

Programming & Development: Python, HTML/CSS, JavaScript, Flask, Django, React.

IT Support: Data Entry, User Technical Support & Help Desk, Network Infrastructure Support, System Troubleshooting & Fault Diagnosis.

Cybersecurity: Threat identification, cyber risk management, security best practices

Tools & Platforms: MySQL, Postgres, QGIS, Microsoft Office Suite (Excel, Word, PowerPoint), Git/GitHub

CERTIFICATIONS

- Huawei Certified ICT Associate (HCIA Datacom) – Huawei
- Introduction to Cybersecurity – Cisco Networking Academy
- Cyber Threat Management – Cisco Networking Academy
- Python Essentials 1 – Cisco Networking Academy

TECHNICAL PROJECTS

HR & Payroll Platform

Flask · PostgreSQL/Supabase · HTML/CSS/JS — Practical Test Submission, Vunoh Global — Live Demo

- Built an internal HR and payroll platform for a timed technical assessment, covering employee records, leave management, and payroll generation.
- Leave workflow checks team coverage before approving a request, enforces minimum notice periods, and auto-escalates unanswered requests after 48 hours.
- Payroll engine applies progressive tax brackets and pro-rates pay for mid-month joiners and unpaid leave; employee records use soft deactivation so payroll history survives an exit.

Leave Management System

Python · Flask · MySQL · HTML/CSS — Prototype for the Ministry of Information, Communications and the Digital Economy — Live Demo

- Built a web-based system to digitize staff leave applications and approvals, replacing a paper-based process.
- Designed the MySQL schema for employee records, leave balances, and approval history, with role-based auth for staff vs. administrators.
- Auto-generates official leave forms as PDFs; interface works on both desktop and mobile.

UsafiLink

Django · React · MySQL · Redis · Celery · Mapbox · M-PESA API — Full-Stack — Live Demo

- Full-stack two-sided marketplace (Django REST Framework + React 19/Vite) matching customers with exhauster truck drivers by proximity, across a 50 km radius.
- Real-time GPS tracking and live vehicle visualization with Mapbox GL, broadcasting driver locations as they move.

- M-PESA integration for mobile payments — transaction auditing, payment verification, dispute resolution — plus a cash-payment fallback with admin override.
- Celery + Redis task queue offloads SMS/email notifications and scheduled jobs from the main request cycle; JWT + Clerk OAuth (TOTP 2FA) handles authentication.
- Deployed on Vercel with CI/CD across Django/Gunicorn, Celery worker, Celery Beat, MySQL, and Redis.

PROFESSIONAL EXPERIENCE

ICT Intern *June 2025 – September 2025*

Ministry of Information, Communications and the Digital Economy (MICDE) | Nairobi, Kenya

- Provided first-line technical support to State Department of ICT and Digital Economy staff, resolving hardware, software, and connectivity issues.
- Maintained and configured ICT equipment — computers, printers, network peripherals — and helped monitor and troubleshoot network infrastructure, escalating faults per departmental protocol.
- Contributed to digital transformation projects tied to e-government systems and ICT governance frameworks.
- Logged system operations, fault reports, and maintenance records to support audit and compliance requirements.
- Handled equipment-inventory and staff-record data entry at 43 WPM with 99% accuracy, and worked with senior ICT officers on user access management and data protection.

EDUCATION

Bachelor of Science in Information Technology **Sep 2022 – August 2026**

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Kenya Certificate of Secondary Education (KCSE), **B plus** **Feb 2018 – April 2022**

Mudasa Academy
